

Healthcare Information Technology Standards Panel

DOMAIN Technical Committees

Focused on healthcare domains

- **Security, Privacy and Infrastructure Committee**
- **Care Management and Health Records Committee**
- **Administrative and Financial Committee**

Terms of Reference

- Identify and analyze gaps and duplications within the standards industry as they relate to domain constructs
 - Describe gaps, including missing or incomplete standards
 - Describe duplications, overlaps, or competition among standards
- List all standards that satisfy requirements imposed by the relevant Use Case or Interoperability Request and apply readiness criteria
- Interact with Standards Organizations to coordinate communication regarding standards gaps, overlaps, and identification of standards
- Evaluate, select and constrain recommended standards
- Receive and prioritize statements of work and collaborate with Perspective Committees to refine scope and develop work plan
- Develop and/or revise domain constructs to meet requirements, high level design and statements of work
- Maximize reuse w/ consideration for backwards compatibility
- Ensure domain constructs adequately support all Interoperability Specifications referencing those constructs
- Work in collaboration with Perspective Committees to meet project schedule and timelines

Committees

Care Management and Health Records Domain Technical Committee

Scope of work:

- Develops specifications for constructs
 - Supports multiple Interoperability Specifications
 - Enables reuse
 - Manages the execution plan and specific schedule of new constructs aligned with the Interoperability Specifications
 - Maintains all existing constructs assigned to their domain
 - Currently establishing work plan
-

Security, Privacy and Infrastructure Domain Technical Committee

Scope of work:

- Identification of Core Set of Constructs

A core set of Privacy and Security constructs identified from all use cases; constructs reviewed and validated/modified upon receipt of new use cases
 - Incorporation of Constructs into Other Technical Committee Document

Privacy and security constructs are incorporated into the documents created by the other TCs to address interoperability in their respective use cases
-

Administrative and Financial Domain Technical Committee

Scope of work:

- Develops specifications for constructs
- Supports multiple Interoperability Specifications
- Enables reuse
- Manages the execution plan and specific schedule of new constructs aligned with the Interoperability Specifications
- Maintains all existing constructs assigned to their domain
- Currently establishing work plan
