

HITSP

Healthcare Information Technology Standards Panel

2009 webinar series . . . HITSP and U.S. healthcare IT interoperability

The Healthcare Information Technology Standards Panel (HITSP) is identifying the standards that will support the exchange of healthcare information across the United States. Learn more about the Panel and how you can engage in shaping the future of HIT interoperability during the 2009 **free webinar series**.

webinar six

Health Information Exchange (HIEs) in the Real World

What you will learn

During this 90-minute webinar, participants will learn how HITSP products are being used today by the New England Healthcare EDI Network (NEHEN), Keystone Health Information Exchange (KeyHIE), and Vermont Information Technology Leaders, Inc. (VITL) from industry professionals implementing the products:

- Learn how NEHEN used standards to deliver a sustainable, growing HIE for administrative and clinical data
- Learn about KeyHIE adoption of national models and standards in the implementation of an HIE providing timely information for patient care
- Learn about VITL's use of standards and success with results delivery, medication history, disease management, and other functions

Who should attend

Consumers, government representatives and policy makers, healthcare providers, standards developers, vendors, and any other interested stakeholder.

Presenters

Noam H. Arzt, Ph.D., FHIMSS, VITL consultant; president, HLN Consulting, LLC

Laurance Stuntz, NEHEN technical architect; partner, Computer Sciences Corporation (CSC)

Jim Younkin, KeyHIE project director; program director, information technology, Geisinger Health System
