Healthcare Information Technology Standards Panel

a webinar series on U.S. healthcare interoperability

The Healthcare Information Technology Standards Panel (HITSP) is identifying the standards that will support the exchange of healthcare information across the United States. Learn more about the Panel and how you can engage in shaping the future of HIT interoperability during a series of **free webinars** held throughout the Summer of 2008.

## Consumer Access to Clinical Information

### What you will learn

During this 90-minute webinar, participants will explore the consumer side of health information sharing, gaining a basic knowledge of:

- the Personal Health Record (PHR) as the consumer's collection point for his or her health information;
- consumer-controlled access to PHR-based information;
- HITSP Interoperability Specifications (IS) for PHR health information sharing over a network or on physical media;
- the Summary Medical Document and its reuse in information exchanges.

### Who should attend

Consumers, government representatives and policy makers, healthcare providers, standards developers, vendors, and any other interested stakeholder.

### Presenters

Co-chairs of HITSP Consumer Perspective Technical Committee

- Charles Parisot, Manager, Standards and Testing, GE Healthcare Integrated IT Solutions
- Scott Robertson, Standards Architect, Information Technology / Health IT Strategy and Policy, Kaiser Permanente
