

HITSP

Healthcare Information Technology Standards Panel

a webinar series on U.S. healthcare interoperability

The Healthcare Information Technology Standards Panel (HITSP) is identifying the standards that will support the exchange of healthcare information across the United States. Learn more about the Panel and how you can engage in shaping the future of HIT interoperability during a series of **free webinars** held throughout the Summer of 2008.

webinar nine

Medication Management

What you will learn

During this 90-minute webinar, participants will gain a basic knowledge of:

- the people, organizations and systems that comprise the medication management cycle;
- the impact of fragmented medication and allergy information on patient care and safety;
- sources of patient-specific medication and allergy information, their advantages and limitations;
- electronic processes, e.g., eRx (electronic prescribing), that facilitate the medication management cycle and improve patient care and safety; and
- similarities and differences between inpatient, ambulatory and long term care settings in the medication management cycle.

Who should attend

Consumers, government representatives and policy makers, healthcare providers, standards developers, vendors, and any other interested stakeholder.

Presenter

Scott M Robertson, PharmD

Co-Chair, Consumer Perspective Technical Committee

webinar nine
